

HOAM & VOAM SERIES
OPEN AIR MERCHANDISERS

A New Approach To Open Air Merchandisers

A total of 28 competitively-priced models in horizontal and vertical versions provides industry-leading value and flexibility to fit almost any sales space requirement. Place the grab and go convenience of HOAM or VOAM models in high traffic areas, such as end caps, for increased profits. Ideal for store entrances or next to foodservice areas to showcase beverages, pre-packaged sandwiches and salads, produce and other items for on-the-go customers.

For maximum security, the solid-end VOAM-C series features a roll-down lockable cover. These models are great for airport kiosks or other areas needing a secure after-hours solution. The cover is built into the canopy instead of mounted on top of the merchandiser, making it easy to fit through standard height doors.

All HOAM and VOAM models share common widths of 36", 48", 60" and 72" so they may be easily interchanged.

Shown in optional stainless steel interior/exterior.

Standard Features & Benefits

Retractable night curtains hold in cold air during off hours to save energy.

Electronic controllers ensure dependable temperature performance.

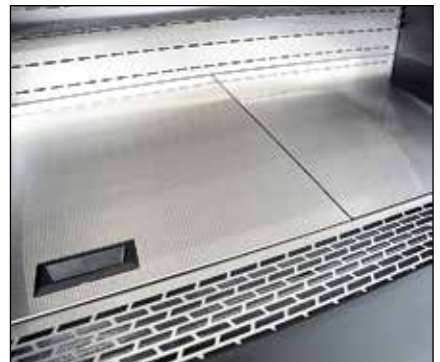

Refrigeration systems are designed for low decibel ratings providing the quietest retail experience.

Versatile, heavy-duty shelving allows for a wide range of products to be merchandised.

LED canopy lighting provides optimum product illumination and helps reduce energy usage.

Non-corrosive stainless steel floor pans on the inside protect evaporator coils from spillage.

The built-in bumper protects from shopping cart damage.

For added performance assurance, each model has a 3-year parts and labor warranty with an extended 2-year warranty on the compressor.

Options

Casters

LED lighted shelf kits
(VOAM models)

Stainless steel interior
and exterior

Lockable lift-off security cover
(VOAM models)

Other options include:

- Custom color interior and exterior
- Sandwich deck (HOAM models)
- Sandwich racks (HOAM models)
- Product hooks (VOAM models)
- Condensate pump for very high humidity areas
- Higher capacity condensate evaporator pan (depending on model)
