1. Alarm Cancel
2. Low Temp Alarm Setting
3. High Temp Alarm Setting
4. Programming Keys
5. Light Switch With Auto Off

## Optional MBWA-1 Alarm & Light Management System

- Leaving doors open and inside lights on are the two biggest energy wasters in walk-ins. Open doors can also compromise food safety. The MBWA-1 system provides alarms and light management to solve these problems.
- -40°F to +230°F range
- Hi/low temperature alarms with delays
- Light management:
  - Turn light on at keypad
  - Light timer for automatic shut off
- Easy to set alarms

Optional wall mount box with external buzzer and automatic light switch

## Optional Packages

- Wall mount box with external 85db pulsing buzzer
- Door open alarm and automatic light switch
- Remote phone dialer
  - 2 circuit phone dialer
  - 2 channel digital input
  - 4 programmable phone numbers for each channel
- Occupancy sensor for light operation and panic alarm
- 30' extended temperature sensor
- Remote buzzer box
- Field retrofit option – all door styles
