

WALK-IN Options & Accessories

*Expand the convenience and efficiency of your walk-in
with a full range of options and accessories.*

Panel Thickness And Finish Options

Master-Bilt walk-ins are constructed of polyurethane insulated panels for superior temperature-retaining efficiency. Standard wall, floor and ceiling panels are four inches thick but **five and six-inch thicknesses are available** for certain applications.

Standard Metal Finishes

Custom Paint Colors

Custom paint colors are available on request. When placing order, send a color sample for matching purposes.

Any Size Or Shape

Master-Bilt walk-ins fit your application with sizes ranging from 4 ft. x 6 ft. to expansive refrigerated warehouses. If your layout requires an L-shape or other special configuration, we can custom design a solution for you.

Other Ways to Customize Your Walk-In

Heavy-Duty Flooring

With a layer of foamed-in place plywood, supports lighter hand carts.

Structural Flooring

Designed to support an evenly distributed load of 5000 lbs.

Security Latch With Electronic Strike

Control access to your walk-in and protect contents.

Push Bar Inside Release

Hands-free, effortless door opening. Requires security latch and electronic strike.

Kick Plates

Protect doors and other panels from dents and scratches.

Ramps

Interior and exterior ramps make it easy to enter and exit your walk-in.

MBWA-1

An all-in-one alarm, thermometer and light management system.

Foot Treadle

Allows sanitary, hands-free door opening when your hands are full.

Viewport In Door

Allows a clear view of inside contents and increases security.

Additional LED Lighting

Provides substantial energy savings and maintains or increases light output.

Glass Doors

Boost sales with increased visibility for your products. Available for coolers & freezers.

Custom Refrigeration Systems

Specify water-cooled systems or special holding temperatures as needed for your project.

LogiTemp® Electronic Controller System

LogiTemp is an advanced electronic controller system that enhances food safety while minimizing energy and installation expenses. It is standard on Split-Pak freezer refrigeration systems 6 H.P. and above and optional on other systems.

Advantages include:

- Precise and reliable controls, surpassing traditional mechanical systems for improved food safety
- Instant error codes and online data availability enable swift troubleshooting
- No need for wiring between evaporator coils and condensing units
- Lower refrigerant usage and no winter charge requirements
- Patented design that saves up to 27% more energy compared to all-mechanical systems, thanks to Demand Defrost technology and shortened defrost times
- Online monitoring and programming, eliminating the need for physical access and enhancing refrigeration performance

LogiTemp Plus with Reverse Cycle Defrost

LogiTemp Plus with Reverse Cycle Defrost is an optional feature for Split-Pak systems 6 H.P. and above. It offers significant additional advantages, including:

- Rapid and complete removal of ice build-up in evaporator coils to prevent food spoilage.
- Reduced defrost energy usage by up to 80% compared to electric heaters, with defrost times as short as 3-5 minutes for freezers and 1-1/2 to 2 minutes for coolers
- Saves refrigerant through reduced charge requirements

Even More Options

- Third door hinge
- Door rain hood (all door widths)
- Strip curtains (all door widths)
- ADT or stainless steel floor overlay kit
- Non-skid floor strips
- Closure panels
- Angle trim and flat trim
- Aluminum diamond tread foamed in floor surface

Shelving Kits fully utilize the space available in your walk-in.
