

ICE CREAM HARDENING AND HOLDING CABINETS

Built for durability and superior performance to deliver the highest quality for your customers.

R290
REFRIGERANT

FEATURES

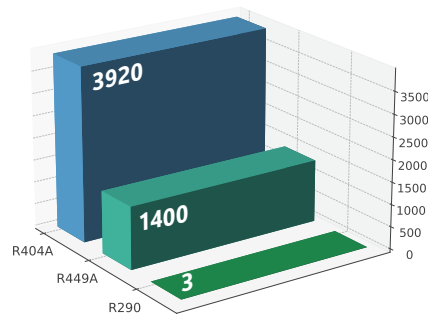

R290 Refrigeration Systems Designed for Rapid Temperature Pulldown

Featuring powerful refrigeration systems with eco-friendly R290 refrigerant, IHC Series cabinets pull down to temperature rapidly and hold it reliably. Ice cream maintains its texture and flavor, ensuring every customer gets the quality experience they're paying for.

Self-contained R290 refrigeration systems strike the perfect balance between sustainability and performance. With a GWP of only 3 our R290 systems eliminate concerns about future HFC restrictions.

Equally important, Master-Bilt systems have been proven reliable through field testing, consistently delivering strong results.
