

PREVENTATIVE MAINTENANCE PROGRAMS

Pick the right service level
for your needs

TIER 1 — ESSENTIAL CARE PROGRAM

Basic Preventative Maintenance

Perfect for a routine health check and basic upkeep.

Included Services

- Verify temperature setpoints and operating conditions
- Visual inspection of the unit
- Clean and inspect evaporator and condenser coils
- Clear and flush drain lines
- Confirm unit is running properly and efficiently
- Identify visible wear or potential concerns
- Inspect door gaskets and cabinet condition

Best For

- Low to moderate use environments
- Cost-effective routine maintenance
- Equipment with minimal performance concerns

TIER 2 — COMPLETE PERFORMANCE PROGRAM

Advanced Preventative Maintenance

A more comprehensive maintenance program maximizing performance, efficiency, and equipment lifespan.

Included Services

Everything included in Tier 1, PLUS:

- Full operational testing in refrigeration and defrost modes
- Detailed inspection of fans and motors
- Inspect and secure wiring and electrical connections
- Verify refrigerant system performance
- Verify proper airflow and temperature consistency
- Review overall system performance and efficiency

Best For

- High-use or mission-critical equipment
- Equipment operating in demanding environments
- Customers focused on reducing emergency service calls
